

MONDI: EFFLUENT TREATMENT PLANT

Semane undertook this project as an EPC contract with a Civil Contractor.

Mondi Business Paper's Richards Bay Mill required a secondary treatment process facility to be able to treat effluent for the purpose of re-use or for discharging back into the natural environment. The work was undertaken by a Design Construction Company which included Semane as structural and surrounding infrastructure engineers.

The success of this truly phenomenal project with its demanding levels of design ingenuity, interface and careful supervision, in an EPC environment was a new challenge for Semane. Being a turn-key project meant that Semane had to work very closely with the Civil Contractor to meet the tight fast track programme.

Project scope included:

- Design
- Project Management
- Site Supervision

Component:

Secondary

Project Location:

Richards Bay

Client:

Mondi Richards Bay

Completion Date:

2005

Senior Staff Involved:

Joe Araujo
Rui Couto
Brian Slabbert
Darrel Easthorpe
